ELECTION OF TEACHERS, -- Immediately after the adjournment of the County School Board. westerday, a meeting of Adington District Seard was held, the County Superintendent boing requested to preside.

Mr. Adams moved to go into an election of teacher for Walker School, No 3, and nomit nated James E. Clements for re election. He went into a history of the troubles there, declaring Mr. Clements fully justified in all that he had done, and that he was sustained by 22 patrops of the school, who desired his re election, whilst only six creams, of whom but three had any direct interest in the matter, wished for his remova'.

Mr. Febrey presented an application from Mr. Henry A. Mr. Febrey said that wills: it might be true that a majority of the people preferred Mr. Clements, it was also true that several persons would not send their children to him; harmony, therefore, would not prevail unless a change was made. Personally he had nothing against Mr. Clements, but he thought the election of an unexceptional teacher, like Mr. Newby. whom he understood from the Superintendent to be thoroughly qualified would be eatisfactory The vote was then taken and resulted as fol-

THE WASHINGTON RECER FRONT. The

Washington Republican . Mys : "Colonel S. T. Albert, Ci vii hing, "eer, has propared his snaual report relating to th." work the Washington and George down harberts. The report states that in order that the change to be dredged may be rendered permanent it , imported that a general plan of coprovement should be adopted, and that its continuation should be provided for by annual appropriations sufficiently large to ensure substantial progress in the work. That the second of the plans discussed by the Board of Survey-that providing for a channel following the so-called Virginia channel-can be executed at less cost than either of the others, and it allords exaint curves for the discharge of the water, and will require a less expenditure for the preservation of its depth. Colonel Albert proposes to confine operations at present to the dredging of a channel following the course of the Virginia channel between Kasby's wharf and the Arsenst, and reclaiming the entire area between the city front and the river channel. He mentions the importance of a radical improvement of the river to the health and presperity of the city. The commerce of the port of Georgetown requires a wide and deep clishnel. The material which it is necessary to redge from the river is suitable for filling the flats, and the dredging will thus serve a doubte purpose. A grade of eleven feet would be amthe discharge of the river at high water. When these channels have sufficiently progressed it will be necessary to reconstruct the present Long Buildge with pices sunk to the depth that the new channels will require. The filling of the flats and Washington channel between the Long Bridge and Arsenal was involve the destruction of the wharves along that part of the city front. At and above Easty's l'oint, as the the excavation would be very expensive, the the penicentent at the last term of the Corpo-work may be limited to the removal of E. Eby's ration Court. The was granted a stay of exc-wharf and the rock near the Analestan Boat curien to enable him to appeal, but has con-House. It is proposed to confine the m; cluded not to do so, terral dumped on the flats by means of a riprap. ped slope with a protection of sheet piling at the low water mark. The estimate cost of those proposed improvements is \$2,592,000. The improvement can be commenced and carried on gradually by annual appropriations of from \$150,000 to \$200,000."

It is understood that this proceeding was taken because of the small amounts shown to have been registered by the parties named, and of alleged violations of the law by not registering dricks when sold.
